	Name	Role

- **Application Live URL:** (Your application should be live)

- **Screencast URL: (**Youtube video link of your product**)**

- **Repository URL: (**Google drive/github/ where your team put all the artifact**)**

- **Credentials**

ROLE	USER NAME	PASSWORD

Table of Content

1. Evaluation of product and process

Expect: Appropriate screen shots and commentary, with cross references to group documents, evaluative comments on the product and on the agile process used to build it

2. Evaluation of team

Expect: A weighted scoring model of the entire team (including yourself) with own choice of criteria and weighting, supported by commentary on each individual member. Model is expected to produce a range of scores for the individual members.

3. Self-evaluation

Expect: Honest description of own contribution and reflection on own performance and any lessons learnt

4. APPENDIX

For e.g-

The Database designer will add

Security, appropriate data types and validation, clear ERD, referential integrity implemented, enables roles to be implemented

OR

The Designer will add
Responsive design, clear information architecture for both mobile and desktop, aesthetically pleasing, good usability, meets accessibility criteria

OR

The tester Will Add

Testing
Test plan, test log, sufficient data to fully test, evidence of testing finding errors, test items linked to user stories in the product backlog

- **Available role for the team member** a database designer, an information architect, a programmer, a web designer and a tester, as well as a scrum master and product owner

- To avoid plagiarism issue we suggest, one role can be taken by one person in a team. No shared role. (One person can take more than one role.)

- In pdf report include your own work in appendix section. No one can include other members work in his documents (This will create plagiarism issue) even if by referencing the member.

- If there is no Agile role member-scrum documentation should be add to appendix with any member mentioned that s/he is also perform that role.

- Please don't follow the earlier year's sample. the approach is different this year.
